

STUDENT PAPERS WILL BE AWARDED STRATTON PRIZES

Presentation Of The Six Best
Papers Scheduled
For June 6

AWARDS ON CLASS DAY

One of the acts of the late Dr. Samuel W. Stratton was the establishment last year of the Stratton Prizes given for the best student scientific papers presented before meetings of the student professional societies during the year. So popular has this contest become and so large is the number of candidates for the coveted prizes that it has been necessary to establish a semi-finals by which to choose the best papers which will then be presented at the finals to be held Class Day, June 6. These semi-finals will be run off Thursday, May 5, and Monday, May 8, at which time all but the six best papers will be eliminated.

When the late Dr. Stratton established these prizes, he did so with the express purpose of encouraging adequate expression of detail in language which would make it comprehensible to the layman; he realized that this was a quality which most engineers lacked. Professor William H. Timbie, of the Electrical Engineering Department, who first announced the prizes, made the significant statement at the time, "An engineer hates to talk. His idea of a good speech is: 'There are the facts, darn you' Take 'em or leave 'em' But engineers must talk for themselves. That's the whole trouble with them. They do all the work, and then some lawyer or business man who talks fast gets all the money."

Papers are Short

Limiting the papers to not more than fifteen minutes will permit the hearing of the six best to be presented at Class Day, allowing plenty of time for the other features of the day.

Turnouts for trial readings have been most gratifying to those sponsoring this contest.

WALKER MEMORIAL ELECTIONS MADE

Edward L. Wemple '33, of Chicago, is the new chairman of the Walker Memorial Committee and Robert Ebenbach '34 and John B. Dunning '34 are the newly-appointed Junior members whose appointments have been approved by the Institute Committee.

As chairman of the Committee, Wemple will have supervision of the activities of this body whose duties include supervision of Walker Memorial and the Hangar Gym, responsibility for the undergraduate bulletin boards, control of all publicity campaigns conducted on the institute grounds, and the maintenance of a record of the heads of undergraduate activities. The position carries with it membership on the Executive Committee of the Institute Committee, which acts as a guiding committee for the larger group.

Dormitory Committee Elections Announced

The recently-elected Dormitory Committee, together with the halls of which the members are chairmen, is given as follows:

Holman — Joseph M. Blanchard
Runkle — Werner O. Bachli
Atkinson — Stephen H. Rhodes
Walcott — Calvin H. Mohr
Bemis — Fred P. Feustel
Goodale — Edward S. Goodridge
Munroe — Frank Vanucci
Hayden — William D. Harper, Jr.
Wood — Thomas E. Shaughnessy

All are members of the Class of 1933. Ware, Nichols, and Crafts will have no hall chairmen next year as they have been reserved for graduate and special students.

Elections to the chairmanship of the new committee will take place today. The following men have been nominated; Feustel, Mohr, and Shaughnessy.

Announce Junior Class Elections to Tau Beta Pi

The following members of the Junior Class were elected to Tau Beta Pi at a recent meeting; George P. Bentley, Donald G. Fink, Roland D. Glenn, Robert A. A. Hentschel, Edward L. Jones, Norman Levinson, George H. Ropes, John D. Rumsey, David B. Smith, Beaumont H. Whitton.

The initiation will be held on May 11 at 6 o'clock, at the Engineers' Club. To be eligible for election to Tau Beta Pi, members of the Junior Class must stand in the first eighth of the Class in scholarship.

Ferro-Alloys Is Subject Of Last Aldred Lecture

Frederick Becket, President Of
Union Carbide Company Is
Final Speaker

Frederick M. Becket, president of the Union Carbide and Carbon Research Laboratories, Inc., New York City, will deliver the season's final Aldred lecture in Room 10-250 at 3 o'clock next Friday afternoon. He will discuss the "Development of the Ferro-alloy Industry." The meeting is open to Seniors, graduate students, Junior honor students, and Faculty members.

Mr. Becket is well known for his distinguished work in production methods in ferro-alloys, the extraction of rare metals from their ores. He is vice-president and director of the Union Carbide Company, the U. S. Vanadium Corporation, and the Electro-Metallurgical Company, and vice-president of the Haynes Steelite Company.

Born in Canada, Mr. Becket received the degree of Bachelor of Science from McGill University in 1895. He also holds the degree of Master of Arts and the honorary degree of Doctor of Science from Columbia University. In 1924 he was awarded the Perkin medal for distinguished service in applied chemistry. Nearly one hundred patents have been issued to Dr. Becket since 1906, mainly in connection with his work in high temperature metallurgy. He has designed, built, and operated the largest electric furnaces in the world.

ACADEMY ELECTS PROFESSOR SLATER

Course VII Head Fifth Member
Of Institute Staff To
Be So Honored

Election of Dr. John C. Slater, Head of the department of Physics at the Institute, to the National Academy of Sciences was announced in Washington on April 27. Membership in the Academy is considered one of the highest scientific distinctions in the country.

Four other members of the Technology staff who have been similarly honored in the past are President Compton, Professor Waldemar Lindgren, Head of the department of Geology, Professor William Hovgaard, department of Naval Architecture and Marine Engineering, and Professor Frederick G. Keyes, Head of the department of Chemistry.

Dr. Slater joined the Faculty of the Institute as Head of the Physics Department in 1930. He was graduated from the University of Rochester in the Class of 1920, and three years later received the degree of Doctor of Philosophy in Physics from Harvard. He was then awarded a Sheldon travelling fellowship from Harvard, entitling him to a year's study in Cambridge, England, and Copenhagen.

Upon his return, he became an instructor at Harvard, and in 1926 was made an assistant professor of Physics. In 1929 he became an associate professor, and prior to joining the Institute staff he studied in Europe as a fellow of the Guggenheim Foundation. Dr. Slater has made notable contributions through his research in Theoretical Physics.

SALE OF SENIOR WEEK SIGNUPS TO COMMENCE TODAY

Blanket Ticket To All Events
Of Week Offered At
Reduced Price

PICNIC SPOT SECRET

Sign-ups for Senior Week begin today in the Main Lobby and will continue for the rest of the week. The price of a sign-up is \$4.00. Redemption will be on May 23, 24, and 25, and will cost \$10.00, making the blanket ticket cost \$14.00. This represents a reduction of \$4.00 over last year's cost.

Seniors can buy separate tickets to different events, if desired. The price schedule is: picnic \$3.00, banquet \$2.50, Pops Concert \$1.50, and Prom \$8.00. The total, if purchased separately, is \$15.00.

Because there was a very big brawl at last year's Senior Week picnic, it has been considered necessary to keep the locale of this year's affair secret. The picnic will take place on June 2. The following day, June 3, the Senior banquet will be held at the University Club.

A special program dedicated to the graduates will be presented at the Pops Concert at Symphony Hall on June 4. Baccalaureate Service will be at Trinity Church, June 5. On June 6, the Stratton Prize will be awarded for the best professional society paper. In the afternoon at Walker Memorial, there will be Class Day, and a tea dance offered free by the Senior Week Committee. On the morning of June 7, Commencement will be held at Symphony Hall. The President's Reception will be in the afternoon. Senior Prom will be at the Hotel Bradford that evening. The orchestra that will play at this event will be announced later.

Business Men Of New England To Inspect Laboratories Today

Council Meets To Discuss New
Products and Importance
Of Research

Manufacturers and business men who are attending the two-day conference of the New England Council on research and new products in industry, will visit the laboratories of Technology today.

The conference was arranged by the New England Council to discuss the importance of research and the development of new products as a means of increasing sales, employment and earnings in 1932.

At Technology the visitors will have an opportunity to inspect the laboratories and will be shown the various ways in which the Institute cooperates with industry in the solution of technical problems.

Meet Tomorrow in Boston

Members of the department of Business and Engineering Administration of Technology, including Professor Erwin H. Schell, its head, and Professors F. E. Raymond and Robert F. Elder, will attend the conference on developments of new products to be held at the Hotel Copley-Plaza tomorrow.

The program at Technology will begin at 9.30 o'clock this morning, when the visitors will assemble in the Physics Auditorium to commence a tour of the laboratories. Investigations in the refrigeration of foods, particularly in the process of quick freezing, will be demonstrated in the Biological Laboratory by Professor S. C. Prescott, head of the department of Biology and Public Health.

Members of the Council tour will assemble at 11 o'clock for a greeting by Vice-President Vannevar Bush of the Institute, and an address on Technology's relations to industry. Resuming the inspection of laboratories, the guests will visit the fuel and Combustion Laboratory.

The visitors will attend a complimentary luncheon given by the Institute at 1 o'clock in Walker Memorial. They will then inspect the mercury arc stroboscope, a device developed by Dr. H. E. Edgerton.

FOUR CREWS TAKE ON CRIMSON BOATS TODAY AT 5.15 P.M.

Baton Cup Award To Instrumental Club Made Friday

Elections To Baton Club Are
Made Following Last
Concert Of Year

The Baton Cup, which is annually presented to the Club in the Combined Musical group which shows the greatest improvement, was awarded to the Instrumental Club at the annual Spring Concert and Dance held last Friday in Walker Memorial. This award was made especially for the work which made the first of the Sunday concerts so successful.

At the same time the new leaders of the several clubs were announced and they each directed their respective organizations in their first public appearances. Harold Traver '32 was chosen as leader of the Glee Club; J. Dillard Collins '33, leader of the Instrumental Club; and Arthur Conn '34, leader of the Banjo Club.

New Men Elected to Baton Club

The following men were elected to membership in the Baton Club, honorary Musical Clubs organization: William A. Baker '34, Joseph M. Blanchard '33, Minot R. Bridgman '32, Edgar B. Chiswell, Jr. '34, Charles M. Davis '32, Clarence W. Farr '33, Winslow V. Fitch G, Warren D. Ford '33, Forrest J. Goldsmith '34, Warren J. Henderson '33, A. G. Hoyer, Max M. Levy '34, Francis A. Lutz G, James R. Merrill '33, Lewis W. Moore '33, Merton S. Neill '34, Albert S. Schulerud G, Robert E. Smith '33, G. Roy Thompson '34, Maurice D. Triouleyre '32, Eugene P. Worthen '32, and Wendell O. Wright '34.

TRACK TEAM LOSES OPENING MEET TO BOWDOIN RUNNERS

Winners Prove Too Strong In
Field Events; Final Score
Is 87 to 48

FRESHMEN ALSO LOSE

Although the track team took an 87-48 whipping at the hands of a superior Bowdoin squad last Saturday afternoon, many of the individual performances were very gratifying to Coaches Oscar Hedlund and Bob Bowie. Captain Johnny Jewett and Dick Bell continued their winning ways, each of them taking a first place besides placing in other events. Altogether the Institute team took five out of fifteen first places and tied for three others.

Bell Takes Century

Dick Bell sent the Engineers off to a flying start by winning the 100-yard dash with plenty of room to spare. His time for this event was 10.2-5 seconds, very fast considering that he was running straight into the wind. Bowdoin runners took both second and third places. If the Institute men had been able to pick up a few seconds and thirds the final result might have been different. Bowdoin cleaned up all three places in six of the events.

Bob Mann captured another first place in the mile. He ran a wonderful race, leading all the way to the home stretch. Usher of Bowdoin slowly closed the gap between them and Mann was trying so hard that he fell down just before he reached the tape. He got up to finish second. He was the only Institute man to place in this event.

Captain Jewett won the quarter-mile in 51.1-5 seconds, while Rees Schwarz took

(Continued on page four)

REVISED VARSITY BOAT HELPED BY TWO EXTRA DAYS

More Coordination Expected
After Additional Practice
By Postponement

CRIMSON POWER MYSTERY

Five-fifteen this afternoon is scheduled to be the starting time of the postponed Harvard crew battle. In spite of the small hurricane on Saturday, cars were lined up from the Technology boathouse to the finish line opposite the Union Boat Club while their drivers waited optimistically. The only race that took place, however, was between a surprisingly fast police craft and what seemed to be a vacationing taxi-driver in a speed boat.

This afternoon is expected to produce much faster and more dangerous Technology varsity and Jayvee crews than might have gone out on Saturday. The postponement has given the Engineers two more days in which to obtain more coordination in the revamped boats, and the additional practice will make them considerably more formidable.

New Lineup Permanent

With the new varsity lineup becoming more at home in the new seats, a considerable improvement is noticeable. The same crews which were to race Saturday are slated to face the Crimson today.

At the present time the untried Harvard eight is the subject of much controversy. Just how fast the Crimson boat actually is will not be known until this afternoon, but it is not expected to measure up to the standard of past aggregations. It is reported, however, that after today's contest, the varsity is to be revised for experimental purposes.

All signs point toward some very close races, particularly since the unexpected and welcome extra two days have served to smooth out the Engineers.

Three crews, representing the Junior, Sophomore, and Freshman classes, will fight it out on the Charles tomorrow for the Richards cup representing intramural rowing supremacy. The best eight men from each division of class material have been chosen and three smooth—well, fairly smooth—boats will take the water

(Continued on page four)

I. F. C. DANCE ON MAY 6 AT NEWTON

So successful was the last Inter-Fraternity Dance held last December at the Hotel Continental that the I. F. C. Committee headed by Robert B. Semple '32, chairman, has arranged another dance to take place at the Brae Burn Country Club, West Newton, on May 6.

Jackie Marchard's Orchestra will furnish the music. This band has built up for itself an enviable reputation for fine orchestrations; its leader, Jackie Marchard, is the drummer of the orchestra at the Copley. Considering the number of engagements the orchestra had this year, the I. F. C. is glad to be able to secure him.

Located in West Newton, the Brae Burn Country Club can best be reached by way of Commonwealth Avenue, which runs past it. Brae Burn needs no introduction; it is a very exclusive and socially-prominent organization. Its size is such, however, that the Committee has seen fit to limit the number of tickets to two hundred and fifty; very few tickets are now available.

The chaperones are: President and Mrs. Compton, Mrs. Jack, Mr. and Mrs. Horace Ford, and Mr. and Mrs. Wallace Ross.

Several little matters have been preying insidiously on the Lounge's mind for the past couple of days or so, but, at that, he must have an insidious mind. The first and most charming of these is the rumor which tells of the Deke who has moved into the Dorms for a week so he can get some work done. Ashes to ashes, and dust—

There is also the tale of another of this famous brotherhood, who went to the Delt Dance with a certain Someone, danced with her for a whole quarter of an hour, and then spent the evening in vain and futile search. The case was not another Charlie Ross, however, having an exceedingly simple solution. The young lady was taken violently and suddenly ill, and it must be so, because she told him so herself when he called three days later to see what kind of a time she had had. Ah me, the birds do sing....

And then we have the matter of elections. It was with pride that the Lounge observed the Tammany Hall tactics of the Institute Committee in their obtuse phrasing of the electioneering referendum. At last we are getting someplace. Is not Technology truly one of the greatest educational institutions in the world? Where else can one combine the advantages of a technical training with that of the successful politician? Forward the banner, Exelsior!

The phrasing of the question itself was one of the most interesting the Lounge has been privileged to witness in years. Doubtless some future Solon spent hours in its formulation. If one wanted electioneering, one said "No," and if one did not want electioneering, one said "Yes."

Unfortunately, the Institute does not carry enough co-eds to satisfactorily settle the question. Only this evening he overheard two unfortunates having an argument as to how they had voted on the question. The one that wanted to say no, had said no, but no was yes so no no was the proper vote to mean no, while the man who had wanted to say yes was explaining how he had voted no since yes meant no and no yes meant yes, which was what he wanted.

OPEN FORUM

In opening its columns to letters addressed to the Editor, THE TECH does not guarantee publication of any communication nor does it necessarily endorse the opinions expressed. Letters on subjects of interest to the student body are welcomed if signed. However, if the writer so desires, only the initials will appear on publication.

To the Editor of THE TECH:

Of Interest to Hams
To All Interested in the Future of Amateur Radio:

Congress threatens seriously to impair the status of amateur radio with a bill which will levy a tax on licensed stations and their operators. There is but one way to defeat this measure; write to your local Congressman and to both Senators from your State advising them to protest this unwise tax. Without doubt the revenue from such a bill would be small, but the harm resulting would be immeasurable.

Act now, for with your cooperation the bill can be defeated.
(Signed) CHARLES W. FINNIGAN '34,
NORMAN B. KRIM '34.

P.S.—Complete information with regard to this measure is posted on the bulletin board of the Radio Society near Room 10-250.

LOEW'S STATE
"Letty Lynton"

In this picture Joan Crawford finds a part that enables her to follow the Garbo type of acting more than has any other of her films, and as Miss Garbo can incite little admiration in the mind of this person, the result is not particularly pleasing. However, the dramatic acting does deserve considerable praise.

The tense scene when Letty, realizing her love for young Darrow (played by Robert Montgomery) calls at the room of her insistent South American lover and asks for the return of certain letters, plans to commit suicide, and then sees the villain drink the poison potion, offers the chance for excellent work. She acquits herself splendidly.

Montgomery, too, makes the most of several lighter scenes as well as the appearance in the District Attorney's office when Letty is to be questioned for murder. The comedy of the picture is well done and does not intrude on the more serious portions. The story, of course, has the typical American happy ending.

B. H. W.

As We Like It

OPERA HOUSE
"The Desert Song"

Nightly at the Opera House the little band of Riff tribesmen and their mysterious leader, the Red Shadow, fly down from the rocky fastnesses of the Sahara Desert to strike terror into the inhabitants of the French outposts. Nightly the gallant soldiers of the hard-hearted French governor go forth vowing vengeance and return empty-handed. But one and all, Mohammedan and Christian, turn at intervals from the pursuit of war to join with moonstruck French maidens in the Romberg melodies of love and desert romance.

If Margot Bonvalet, guest of the governor of Morocco, had not been so romantically irrational and so deeply enthralled by the stern, masterful man of the desert, she might have recognized in the Red Shadow, the voice, stature, and bearing of Pierre, the do-nothing son of the governor, and saved everyone a lot of bother. A little red mask is a thin disguise. But such speculation has no place; "The Desert Song" is romance to be taken at its face value, with thrills, noise, motion and suspense in plenty.

William O'Neal is at his best as Pierre, rather than as the swashbuckling outlaw; for the part of Pierre requires better acting, more clever characterization, than the stereotyped remainder of the cast. Charlotte Lansing is his heroine, tearful or gay, imperious or submissive, as the occasion demands. Harry K. Morton furnishes the comedy element, ably supported, in quip or dance, by Louise Brown. Ara Gerald plays the villainess.

R. J. D.

IN THE SPRING

IN the spring a young man's fancy turns to quite a number of things, and if the man happens to be a Technology undergraduate it probably turns to thoughts of electing the men who will carry on the work of the particular activity with which he has been connected. Elections for class officers have been held and the new Institute Committee is ready for the installation next Thursday, but elections and appointments are being made on every hand for the various other student activities.

During the greater portion of the school year the Point System Committee has little to do other than record the routine appointments and elections. In the spring, however, when all nature is again rising to action, this committee must bestir itself to the proper discharge of its increased duties. During the past few weeks the committee has been correcting, revising, and bringing its records up to date. Now that this task is well on its way to completion, it must use due caution in approving the elections and appointments of new men who may be overpointed. If the system is to function, it must cover all men in activities and include all undergraduate offices. The committee has worked efficiently in the past; it must continue to do so.

I WON'T PLAY

NOW and then there bobs up the opinion that something was a bit irregular about the class elections of last week. Most of those venturing comments believe that despite the constitutional prohibition of such groups there were indications of a voting block operating in the present Sophomore Class.

That there was a deliberate attempt on the part of anyone to form a block of men who would all vote for the same candidates would be most difficult to prove, even were it so; and this is in itself open to much doubt. The point to be raised, however, is not that there may have been an agreement among some members of a class to elect a certain man, but rather that some individuals, feeling their candidates were not given a square deal in the elections, may refuse their cooperation to the man who has been officially declared the successful candidate and who will lead class activities for the next year. Any attempt to boycott activities can result only in damage to the class as a whole; the man who has been chosen must receive the support of every man if the work and spirit of the class is to be continued. We are above acting the part of the little boy who won't play soldier unless he can be captain.

SENIOR HEAT

THE date has been set. The first stage of the annual Senior Superheater which appeared this morning states that Senior Week, the glorious climax of four years of undergraduate life for the Class of 1932, will be held from June 2 to June 7. Activities range all the way from the picnic which will be held after a cruise to an unnamed destination, to the dignified Commencement ceremonies to be held in Symphony Hall. The Class which has worked together, attended the same social functions, and taken part in undergraduate activities as colleagues and competitors, will have its last meetings during this week.

To some Commencement is a time of sadness. Associations of several years standing will be broken. College days are over, and life at Technology has ended. To others Commencement is more pleasant. It marks the end of preparation and training. The longed-for day when actual work can begin will have arrived. There is the pleasant as well as the sentimentally-sad side of graduation.

Graduation is an event of no small proportion in the life of a man, and what more appropriate way of celebrating it can be found than participating in the last activities of the class as a student unit of Technology? It is a time of good cheer and a time of serious thought. The program includes events of both kinds. Those who take part in all the activities will experience fully the joys of functioning with the class as it takes its leave of the Institute.

FIFTH AVENUE AT FORTY-SIXTH STREET

Let's smoke a MAN'S SMOKE!

WHEN the girls begin to cut corners in our cars and do back somersaults in our planes and borrow our cigarettes—then it's time to take to a pipe!

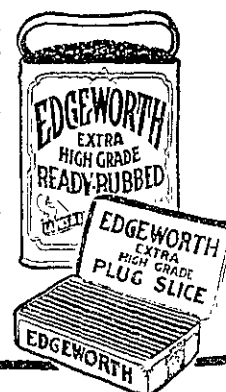

Call it the last stronghold of masculine defence—or the one pet diversion our little friends keep their fingers off. Call it what you will—there's something downright satisfying, understanding, companionable about a friendly, mellow, MASCULINE pipe! It's a real man's smoke!

And a pipe's at its best when you fill it up with Edgeworth. There's a rare, mellow flavor to the Edgeworth blend of fine burleys that simply can't be touched. It's cut long—to give you a cool, slow-burning smoke. And you'll find it the favorite with smokers in 42 out of 54 colleges.

You can get Edgeworth wherever good tobaccoists sell smokes. But if you've never tried it, we'd like the fun of treating you to that first satisfying pipeful. Just write to Larus & Bro. Co., 105 S. 22d St., Richmond, Va.

EDGEWORTH SMOKING TOBACCO

Edgeworth is a blend of fine old burleys, with its natural savor enhanced by Edgeworth's distinctive and exclusive eleven process. Buy Edgeworth anywhere in two forms—Edgeworth Ready-Rubbed and Edgeworth Plug Slice. All sizes, 15¢ pocket package to \$1.50 pound humidor tin.

Alligators To Play
B. U. For First Game

Manager Schneider Has Four
Games In View; Lineup
Is Announced

Technology's newly-organized unofficial baseball team, the Alligators, will probably swing into action this coming Saturday. The team's exact schedule is not yet known, but all indications point to a contest with Boston University this weekend. Manager Schneider has several other tentative contests in view, among them games with Tufts, Northeastern, and Wentworth Institute.

Captain John Leslie of the Alligators has announced his probable starting lineup for the first game. It includes Welch, 1b; Hayden or Amenta, 2b; Eagan, ss; Wall, 3b; R. Smith, lf; Coffey, cf; Johnson, rf; Wehmiller, c; Hall, p. Other promising hurlers on the squad are Newman, Jamie-son, Leslie, and Coon.

Seniors Still Undefeated

In the interclass race, the undefeated Seniors continued at the top of the list by beating the Juniors yesterday, 8 to 7. Hall clouted a home run with the bases full for the winners, while Newman's triple featured the Juniors' attack. John Leslie, on the hill for the Seniors, chalked up his second victory in the tournament; Coon pitched well for the losers.

Last week the freshmen broke even in a pair of games, losing to the Seniors 9-6, and then besting the Sophomores by 9 to 6. Bob Forster, who pitched in both games, was the hero of the second contest, hitting a home run and holding the opposition in hand at all times. Goldberg also did stellar work at bat, driving in four runs.

At the present time the Seniors are leading the parade while the other three teams are deadlocked. The standing:

	Won	Lost
1932	3	0
1933	1	2
1934	1	2
1935	1	2

GOLFERS WIN FIRST
MATCH OF YEAR 4 - 2

Technology's golf team got off to a promising start last Friday at Worcester by chalking up a 4-2 victory over the Worcester Tech golfers. Captain George Churchill and Coleman won their matches quite easily, but Esslinger and Rash, in the other foursome, found the going tougher. They lost the foursome best-ball match by 2 and 1, and Rash lost to his opponent in the singles as well. Esslinger made a splendid comeback in the latter part of the round to defeat Kowalski, 1 up, in the match that proved decisive.

As yet the team is by no means decided. Anyone interested in trying out is requested to get in touch with Captain Churchill.

VARSITY STICKMEN
LOSE SIXTH GAME

Are Shellacked By Navy, 24-0,
After Tufts Triumphs
By 6-3 Score

Six straight defeats is the unenviable record of Technology's varsity lacrosse team. Last Wednesday afternoon the stickmen played a fighting game against Tufts at Medford, but were the victims of several bad breaks and lost the decision, 6 to 3. Then last Saturday they travelled to Annapolis and absorbed a terrific beating from the crack Navy team. The final score of this tragic match was 24 to 0 in favor of the Middies.

In the Tufts contest, the Engineers gave a good account of themselves, but the Jumbos were quick to grab any scoring

chances that came their way. Captain Timmy Ring of the Medford school was the game's outstanding star, netting four goals. Ludman, Asch, and Sysko scored for the Beavers.

Navy Game Complete Rout

Saturday's game with the Naval Academy was a complete rout for the Institute stickmen, who were playing minus the services of several stars, notably Keskulla and Sysko, the latter being out of the game with a charley-horse. Although the entire Navy second team was in during the second half, the Beavers offered but slight resistance to their efforts. The burden of the Midshipmen's bombardment was borne by goalie Borger, who resisted nearly thirty thrusts during the game. The Engineers only approached Navy territory about five times, and during the

rest of the time the play was entirely in their own crease.

Freshmen Forfeit to Andover

Technology's freshman team, which was to have opened its season last Saturday against Andover, was forced to cancel the match because less than one full team reported for the trip.

Still hopeful of gaining their initial victory, the varsity players will face Boston University at the latter's field this Saturday.

The summary of the Tufts match:

Tufts—Simmons, g.; Hubbard, p.; Cochran (Story), cp.; Bigran (O'Brien), 1d.; Kontevic, 2d.; Pierce (Wise), 3d.; Priestly, c.; Ring, 3a.; Daman, 2a.; Koullis, outhome; Kogham, inside home.

THE SHELTON
at 49TH and Lexington NEW YORK

When the Shelton opened (7 years ago) we began catering to college men and women. Gradually their patronage has increased; we feel safe in asserting that more students make the Shelton their New York home than at any club or other hotel. One reason for this is the free recreational features plus a desire to serve on the part of Shelton employees. Room rates have been greatly reduced. Rates from \$50 per month upward. A room from \$2.50 daily.

Club features (free to guests) are as follows: Swimming pool; completely equipped gymnasium; game rooms for bridge and backgammon; roof garden and solarium. Restaurant and cafeteria service at reasonable prices.

OFFICIAL BULLETINS OF GENERAL INTEREST

Physics and Physical Chemistry Massachusetts Institute of Technology
Thursday, May 5, 3.00 p.m., Room 4-231

Seminar, directed by Professor Linus Pauling: "The Energy of Resonance of a Molecule Among Various Electronic Structures."

PI DELTA EPSILON MEETING

There will be a meeting of the old and new officers of Pi Delta Epsilon this afternoon at 5 o'clock in Mr. Killian's office.

There will be a general meeting of all members of Pi Delta Epsilon Tuesday afternoon, May 10, at 5 o'clock, in the West Lounge.

UNITARIAN FOREIGN CLUB

Dr. Guyson, minister to students of Greater Boston Unitarian churches will be at Technology tonight to meet all Unitarian and Liberal students. Dr. Guyson has been successful in forming such clubs at Radcliffe, Wellesley, Tufts, and other Boston schools.

The purpose of these clubs is to promote social relations and good will among the Liberal students of greater Boston. Dr. Guyson will meet all students interested in the project between 4.15 and 5.30 o'clock. Refreshments will be served free of charge.

GYM TEAM

There will be a Gym Team banquet Thursday evening, May 5, at 6.15 o'clock, in North Hall, Walker Memorial. At the meeting, the captain will be elected, and special speakers have been invited.

FRESHMAN LOSE IN MEET WITH ANDOVER

(Continued from page one)

third place. Jewett also took third in the 220-yard dash. In this race Bell finished in a dead heat with McLaughlin of Bowdoin for first place. This was one of the best races of the meet. The two winners raced neck and neck for the last fifty yards.

Jack Kearns easily won the two-mile race. Lavendar of Bowdoin raced him on even terms until the last lap when Kearns walked right away from him. The time was 9 minutes and 51 seconds. Technology failed to take a place in the half-mile. Barrett, running in fourth place, was the first Institute man to cross the tape.

Coon Ties in High Jump

Coon tied with Stanwood of Bowdoin in the high jump at 5 feet 11 1/2 inches. Adams took third for the Maine Staters. Walt Wrigley won the broad jump with ease, his longest jump being 22 feet, 11 3/4 inches. This jump beats the Institute record by three inches, but owing to the high wind this will not be allowed as a new record. Ball also placed in this event, taking third honors. In the javelin throw, Technology took both first and second places, Robertson taking first with a throw of 182 feet, while Winerman threw it over 165 feet.

The pole-vault ended in a triple tie at 11 feet. Green and Pierce, both of Technology, tied with Pope of Bowdoin. In the remaining events, Bowdoin took all three places.

Freshmen Swamped at Andover

While the varsity was fighting it out with Bowdoin, the freshmen were being snowed under at Andover. The final score was 102-24 in favor of the prep-school boys. Chalmers in the mile, and Horton in the "440", were the only first-place winners for the freshmen. Dixon took seconds in the pole-vault and the javelin to be the highest scorer for the Class of '35.

DO YOU INHALE?

Why is this
vital question so much
avoided by other cigarettes?

EVER since Lucky Strike created that special process for purifying fine tobacco and told the full facts about cigarette smoking—the industry has been in an uproar. For Lucky Strike has dared to mention things that were considered "taboo" in the cigarette trade.

You may have noticed a striking avoidance generally of the word "inhale" in cigarette advertising. Why? Goodness only knows! For everybody inhales—knowingly or unknowingly! Every smoker breathes in some part of the smoke he or she draws out of a cigarette.

That's why it's all-important to be certain that your cigarette smoke is pure and clean—to be sure you don't inhale certain impurities.

Do you inhale? Lucky Strike has dared to raise this vital question—for it gives you the protection you want... because certain impurities concealed in even the finest, mildest tobacco leaves are removed by Luckies' famous purifying process. Luckies created that process. Only Luckies have it!
